

Megha Sharma

Front End Developer

A self-starting front-end developer, looking forward to work as a Javascript Developer. Interested in the job role of ReactJS based web and mobile-app developer in an organization, where I can utilize my code understanding and development skills, to efficiently fulfill the requirements of clients and customers.

WORK EXPERIENCE

Web Developer

TS Digisol Pvt Ltd

08/2021 - 04/2022

Remote

A product based company where I worked on development of their core product by adding new features.

Achievements/Tasks

- The platform code used a custom web framework, which had a steep learning curve.
- I went through understanding the code written till the point I joined and took over from there in developing half-built features as well as adding completely new features
- This role required understanding the requirements from the domain teams, and then getting the same quality-tested from the QA, before getting my changes as part of the build in staging environment that specializes in Digital commerce solutions.
- Entire JS/TS codebase was quality tested using ESLint and Prettier in a CI/CD apart from developer workstation in cloud using Gitlab pipelines also.

Web developer

22Appler Solutions Pvt Ltd

01/2021 - 07/2021

Remote

22Appler/Appler is a software consulting agency

Achievements/Tasks

- I interned for 2 months and then went ahead to work as an employee on client projects to implement my web and mobile apps development knowledge and work on real client deliverables for the first time.
- worked on an application called Localtrip where a travel activities planning and booking app was being developed.
- It was a small but knowledgeable team, where I learnt the nuances of web and web skills based mobile app development(with React Native).
- Skills that I learnt and used were firebase, reactjs, expo and react-native
